Vehiculo

+Chasis: String
+Model o: String
+Consumo de gas : Char
+Year: Int

-Consumo de gas(): Return String

Car

Truck

Yacht

Motorcycle

Technical report

Through a program, a vehicle catalog must be created, where a user has the option of creating an engine or different types of vehicles, such as a car, a yacht, a truck or a motorcycle, in which they request the characteristics that has said engine or said vehicle To create the program, object programming had to be used, where vehicle inheritance had to be done since there are several types of vehicles.
